Middle School Information Literacy Map

Grade and Project:	6th - Me in 3 Pictures (Jani)	6th - What Inspires You? (Jani)	7th - NASA (Science team)	8th Science Fair																				
Framing an Appropriate Research Task:																								
Define a research topic appropriate to a specific				I																				
Develop a research plan			I	I																				
Easybib Citation:																								
Books		I																						
Databases				I																				
Websites			I	I																				
Images	I	I																						
Export works cited to Google Docs or Word	I																							
Incoporating a works cited list in	I																							
Bibliographies vs. works cited lists																								
Research Note Taking:																								
Mid-Pacific note card format																								
Document-based formats				I																				
In-Class Note Taking:																								
Outlining																								
Visual note taking																								
Cornell-Style notes																								
Semantic mapping																								
Webbing																								
Guided notes																								
Copyright/Creative Commons/Licensing:																								
Copyright basics	I	I	R																					
Fair use	I	I	R																					
Appropriate use (works cited, attribution, etc.)	I	I	R																					
Indentify and use sources for copyright friendly images,	I	I	R																					
Print Sources:																								
Using call numbers																								
Indexes and Tables of Contents																								
Soruce evaluation - Advantages/Weaknesses of print																								
Locating required citation information																								
Ebook Sources:																								
Locating and Accessing ebooks																								
Locating and using content within an ebook																								
Sources Evaluation - Advantages/Disadvantages of																								
Locating required citation information																								
Database Sources:																								
Locate and select database(s) appropriate to needs				I																				
Location and access of content within a database				I																				
Source evaluation - Advantages/Disadvantages of the				I																				
Locating required citation information				I																				
Website Sources:																								
Search engines vs. directories				I																				
Source evaluation - Advantages/Weaknesses of websites				I																				
Locating required citation information				I																				
Web Searching:																								
Reading an online interface				I																				
Command+F - Search within text																								
Keyword selection				I																				
Word order																								
Image searching	I																							
Database Searching:																								
Keyword selection				I																				
Filtering/Sorting in results lists				I																				
Thesis Statements:																								
Develop a 3-part thesis--Persuasive																								
Develop a 3-part thesis--Analytical																								
Products and Processes:																								
Outlining basics																								
Reflection on the product																								
Reflection on the purpose																								
Reflection on the process																								
Browsing:																								
Browsing tools and apps																								
Developing browsing as a habit-of-mind
